

National Ocean Acidification Training Workshop

In an effort to support Thailand in achieving the Sustainable Development Goal 14: Life below water, the national workshop aims to develop and strengthen its capacity for ocean acidification monitoring and research; establish an ocean acidification network among scientists, institutions, and agencies in Thailand; recommend, and explore the possibility of joint long-term monitoring and/or research program(s) on the impact of OA in Thailand.

2-4 November 2022

at Prince of Songkla University, Phuket campus and
Phuket Marine Biological Center (PMBC), Phuket, Thailand

Training Content

- Introduction to Ocean Acidification (OA)
- Study on impacts of OA on marine ecosystems
- Assessing impact using Autonomous Reef Monitoring Structures (ARMS) technique
- Introducing spectrophotometric method for pH measurement
- Introducing auto-titration for Total Alkalinity measurement

Invited speakers

Somkiat Khokiattiwong (IOC/WESTPAC)
Suchana Chavanich (Chulalongkorn University, Thailand)
Lalita Putchim (DMCR, Thailand)

Register now

Deadline: 30 September 2022

Limited slots available to register!
